Career Exploration Guide for Social Services

In today's world, the open employment market is becoming increasingly competitive, and for persons with disabilities, finding suitable employment opportunities can be particularly challenging. In response to this, there is a growing need for initiatives that aim to bridge the gap between persons with disabilities and the open job market and enable them to explore potential career opportunities. This objective is also in line with the EMP2030 target employment rate of 40%.

The current Singapore SkillsFuture (SSG) Skills Framework is designed for persons without disabilities, and our 'Career Exploration Guide' has been developed by referencing and adapting the SSG SFw Critical Core Skills (CCS) and aligning them with the Enabling Skills and Competencies Framework (Persons with Disabilities). Furthermore, the 'Career Exploration Guide' also offers a list of potential workplace challenges and corresponding accommodations that can assist individuals with disabilities in their employment.

By doing so, we hope to provide persons with disabilities with a more comprehensive and relevant skills framework to support their **job search and career development**.

Development of the Career Exploration Guide

The 'Career Exploration Guide' was designed to address the disparity in employment rates among persons with disabilities. This guide highlights the key soft skills and possible challenges and accommodations required for typical roles across different sectors, to better align the interests and abilities of persons with disabilities.
